We have designed a new UI/UX for AmazingCollection.net, a website that deals with buying digital products like Netflix. Our design aims to accommodate users who do not have Visa or MasterCard and allow them to create accounts on public networks such as Hulu or Disney+.

Our design includes 6 pages:

- 2 pages with the same view for the terms and refund text
- The main category page
- The subcategory page
- The cart page
- The main page
- The product view page

Note we send photo for before and after and pdf for after designing our new version for better view , you can check the online website for better view ([Amazing Gadget and Digital Products For Every Need \(amazingcollections.net\)](https://amazingcollections.net))
